Home Page

- 1 LOGO
 UX: This is the logo for the website.
 UI & Dev: Clicking this logo will take the user back to the home page
- 2 CONNECT
 UX: Clicking this link will take the user to the connect page
 UI & Dev: The link will have a hover stage on mouse enter
- 3 INSPIRATION
 UX: Clicking this link will take the user to the art inspiration page
 UI & Dev: The link will have a hover stage on mouse enter
- 4 LOGIN
 UX: Returning users can click this link to login to the website
 UI & Dev: This link will be light grey and will have a hover stage on mouse enter
- 5 SIGN UP
 UX: First time users can click this link to sign up and create their user profile
 UI & Dev: This link will be light grey and will have a hover stage on mouse enter
- 6 WELCOME HEADING
 UX: This is the welcome header followed by a brief paragraph about the website
 UI & Dev: UI designer can make design decisions in terms of font weight and size and maintain a proper hierarchy throughout the page
- 7 INTRODUCTION PARAGRAPH
 UX: This paragraph give a brief introduction of the website
 UI & Dev: UI designer can make design decisions in terms of font weight and size and maintain a proper hierarchy throughout the page
- 8 WELCOME IMAGE
 UX: This is a welcome image. This image will represent a piece of art or inspirational image submitted by the website user
 UI & Dev: This image is not clickable or expandable
- 9 ART INSPIRATION SUBHEADING
 UX: This subheading will represent art inspirations around different neighborhoods
 UI & Dev: This heading will change randomly and represent various art from different Chicagoland suburbs. UI designer can make design decisions in terms of font weight and size and maintain a proper hierarchy throughout the page
- 10 ART INSPIRATION CARD
 UX: This card will show art image submitted by the artist, followed by number of views, user comments and favorites
 UI & Dev: Hovering over the art image will display a short synopsis of the art and the user can further click to view more details of the art
- 11 CONNECT SUBHEADING
 UX: This subheading will represent art user groups around different neighborhoods
 UI & Dev: This heading will change randomly and represent various user groups from different Chicagoland suburbs. UI designer can make design decisions in terms of font weight and size and maintain a proper hierarchy throughout the page
- 12 GROUP CARD
 UX: This card will have the group name heading, followed by the number of members and an option to join. At the bottom of the card, it will show if the group is public or private.
 UI & Dev: The card will have a background image chosen by the group moderator. On mouse hover, the card will get darker but the text will remain the same

Onboarding: Create profile

- 1 SIGN UP HEADING**
 UX: This is a heading for sign up
 UI & Dev: UI designer can make design decisions in terms of font weight and size and maintain a proper hierarchy throughout the page
- 2 LIGHTBOX CLOSE ICON**
 UX: Clicking this icon will close the lightbox and homepage will appear
 UI & Dev: This icon should be 'x' shape without any hover state
- 3 NAME TEXTFIELD**
 UX: User will insert name in this text box
 UI & Dev: The hint 'name' should be displayed in the text box. The hint will disappear once user starts typing the name
- 4 EMAIL ADDRESS TEXTFIELD**
 UX: User will insert email in this text box
 UI & Dev: The hint 'email address' should be displayed in the text box. The hint will disappear once user starts typing the email address
- 5 CITY TEXTFIELD**
 UX: User will insert city in this text box
 UI & Dev: The hint 'city' should be displayed in the text box. The hint will disappear once user starts typing the city
- 6 STATE DROPDOWN**
 UX: User will use the drop down menu to find the state
 UI & Dev: There will be a drop down menu for the user to find the state (abbreviated)
- 7 PASSWORD TEXTFIELD**
 UX: This is a mandatory field for the user
 UI & Dev: The hint 'password' should be displayed in the text box. The hint will disappear once user starts typing the password. The password should be displayed once user starts typing it and will convert to asterisks once user goes to the next text field
- 8 USERNAME HEADING**
 UX: This is a heading for username
 UI & Dev: UI designer can make design decisions in terms of font weight and size and maintain a proper hierarchy throughout the page
- 9 USERNAME SUBHEADING**
 UX: This text will display a brief information about the username feature
 UI & Dev: UI designer can make design decisions in terms of font weight and size and maintain a proper hierarchy throughout the page
- 10 USERNAME TEXTFIELD**
 UX: User will insert username in this text box
 UI & Dev: The hint 'username' should be displayed in the text box. The hint will disappear once user starts typing the username
- 11 CONTINUE BUTTON**
 UX: Clicking this button will take the user to the next section of signup
 UI & Dev: This button will have a hover state when the user clicks
- 12 LOGIN**
 UX: Returning users can click this link to login to the website
 UI & Dev: This link will be light grey and will have a hover stage on mouse enter

Groups_MainPage

- 1 GROUPS & EVENTS NAVIGATION
UX: This tab allows the user to be able to toggle between the Groups + Events page.
UI: The active tab should be bolded so that the user is aware of the page they are currently on.
IxD: Hover state of the text = Different color and bold the text that's being hovered over. However, if the page that the word represents is currently active, then the text doesn't change when the mouse is hovering.
- 2 MY GROUPS SECTION
UX: When the user joins a group, their active groups will appear in this section.
UI: Push the "Explore Recommended" section a little lower so that the user has a clear understanding of the 2 different sections.
Dev: When the user joins a group, their active groups will appear in this section. The text can be removed once they join a group.
- 3 EXPLORE RECOMMENDED SECTION
UX/Dev: This section is a list of recommended groups based upon the interests and location the user inputted during on boarding.
Untested: Having a max of 9 groups appear on the page - if the user continues to scroll, apply progressive disclosure and continue the list by including an additional 9 groups. Users have responded well to having less information on the page, this process may help them feel less overwhelmed.
- 4 GROUP EXAMPLE CONTENT
UX: These are card that provide high-level view of group details. Includes the group name, number of members, and the type of group (public or private). Public Groups mean that anyone can join. Private Groups mean you have to request to join. Users indicated that they felt private groups meant members were more engaged.
Future Testing: Diversify the UX copy as users felt that the current examples indicate that they need to have a deep understanding of art & design. Also include a clear location indicator of the group - possibly next to the member count.
IxD/UI: Incorporate an image that depicts the main goal/topic of the group (likely to be submitted by the group creator themselves). When the mouse hovers over the box, include grey out the image but keep the text bold and easy to read.
- 5 SEARCH BAR
UX: Find is where the user inputs the category of groups the user is interested in. Near indicates the location that are looking for the group in.
IxD: As the user types into the text box, remove the hint text. Hover state for the magnifying glass is a lighter shade on the icon.

SCREEN

Groups_GroupsDetail

1 MAIN GROUP PHOTO

UX: Users indicated that photos are important for to allow them a better understanding of what the group is about.
UI: Be sure to have the photo displayed in a way that makes it stand out from the rest of the text

2 FOUNDER DETAILS

UX/Dev: The founder details is pulled from whoever started the group.
Future Testing: Clicking on the text to view founder's profile
IxD: Hover state = bolded text in a different shade to indicate it's a button.

3 DASHBOARD NAVIGATION

UX: Navigation bar where users can click to get additional details on "About" "Events" "Photos" etc.
Dev: Selecting one of the buttons opens up a new page of details regarding "Events" "Photos" etc.
IxD: Hover State = Bolded text in a different color shade

4 DASHBOARD VIEW

UX: Quick view that provides a summary of what the groups is about. Users mentioned "About" "Photos" & "Events" as the most important sections of information.
Future Testing: Remove the other sections, reduce preview items on the event cards so that more photo previews can be shown.
UI: Users like more visuals with less text.

5 SEE MORE EXAMPLE

Dev: When clicking this text, the screen opens up the appropriate page, "Event" "Members" etc.
IxD: Hover State = Bolded text, change text color

6 EVENT CARD

UX: Snapshot of event details, primarily the description, title, & date.
UI/IxD: Hover State = Grey out the background and adjust the color of the text
Dev: When the user clicks on the Events section, a lightbox shows more details

7 DISCUSSION BOARD CARDS

UX: Snapshot of conversations being had on the group page
UI/IxD: Hover State = Grey out the background and adjust the color of the text
Dev: If the user clicks the card, the user would be taken to the "Discussion Board" page of the group.

8 JOIN BUTTON

UX: CTA button to have the user join the group.
UI/IxD: Hover State - Button background color darkens
Dev: Upon clicking, a light-box for joining pops up

2

Inspiration Near You

3

Search

4b

4a

4c

5

Featured Inspiration

6

Sort By Viewed Commented Favorited

1

FEATURED INSPIRATION

UX: Clicking this link will open Featured Inspiration page
 UI/IXD: When mouse is over the text and icon it boldens, and the color changes to grey

2

INSPIRATION NEAR YOU

UX: Clicking this link will open the Inspiration around you Link. When clicked, it will take the user to town inputed on the user's profile.
 UI/IXD: When mouse is over, the text and icon it boldens, and the color changes to grey

3

SEARCH

UX: Clicking this link will open a search box were the user can enter text in the search field to find inspirations on the site.
 UI/IXD: When mouse is over, the text and icon it boldens, and the color changes to grey. A micro-interaction or maybe a lightbox would be nice to add showing the search field appearing.

4

FEATURED IMAGE CAROUSEL WITH ARROWS

UX: Users can click through the carousel to view a selection of artwork, films and quotes ChiDM has curated.
 UI: This images represents an artwork, films, or quotes that ChiDM has curated.
 IXD: When the user clicks the previous arrow the current image slides to the left and a new one appears. When the user clicks the next arrow the current image slides to the left and anew image appears.

5

FEATURED INSPIRATION HEADER

UX: This is sub heading will represent featured inspiration curated by ChiDM
 UI & Dev: UI designer can make design decisions in terms of font weight and size and maintain a proper hierarchy throughout the page

6

SORT BY

UX: Future testing: Currently these Sort by button don't work.
 UI/IXD: What we envision is that these links would sort inspirations by viewed, commented, and favorited. Additional sorting categories can be added, but should be limited to around 5-7 items. These can be either tab links or a drop-down menu.

1 ARTWORK INSPIRATION POST

UX: Clicking this link will take the user to the Artwork inspiration page. Each post shows the user profile, numbers of views, comments, and favorites.

UI & Dev: The link will have a hover stage showing a quote on when mouse is over. When clicked on, a post of the Artwork will show up with a lightbox darkening the background.

2 FILM INSPIRATION POST

UX: Clicking this link will take the user to the Film inspiration page. Each post shows the user profile, numbers of views, comments, and favorites.

UI & Dev: The link will have a hover stage showing a quote on when mouse is over. When clicked on, a post of the Film will show up with a lightbox darkening the background.

3 QUOTE INSPIRATION POST

UX: Clicking this link will take the user to the Quote inspiration page. The link will have a hover stage showing a quote on mouse enter. Each post shows the user profile, numbers of views, comments, and favorites.

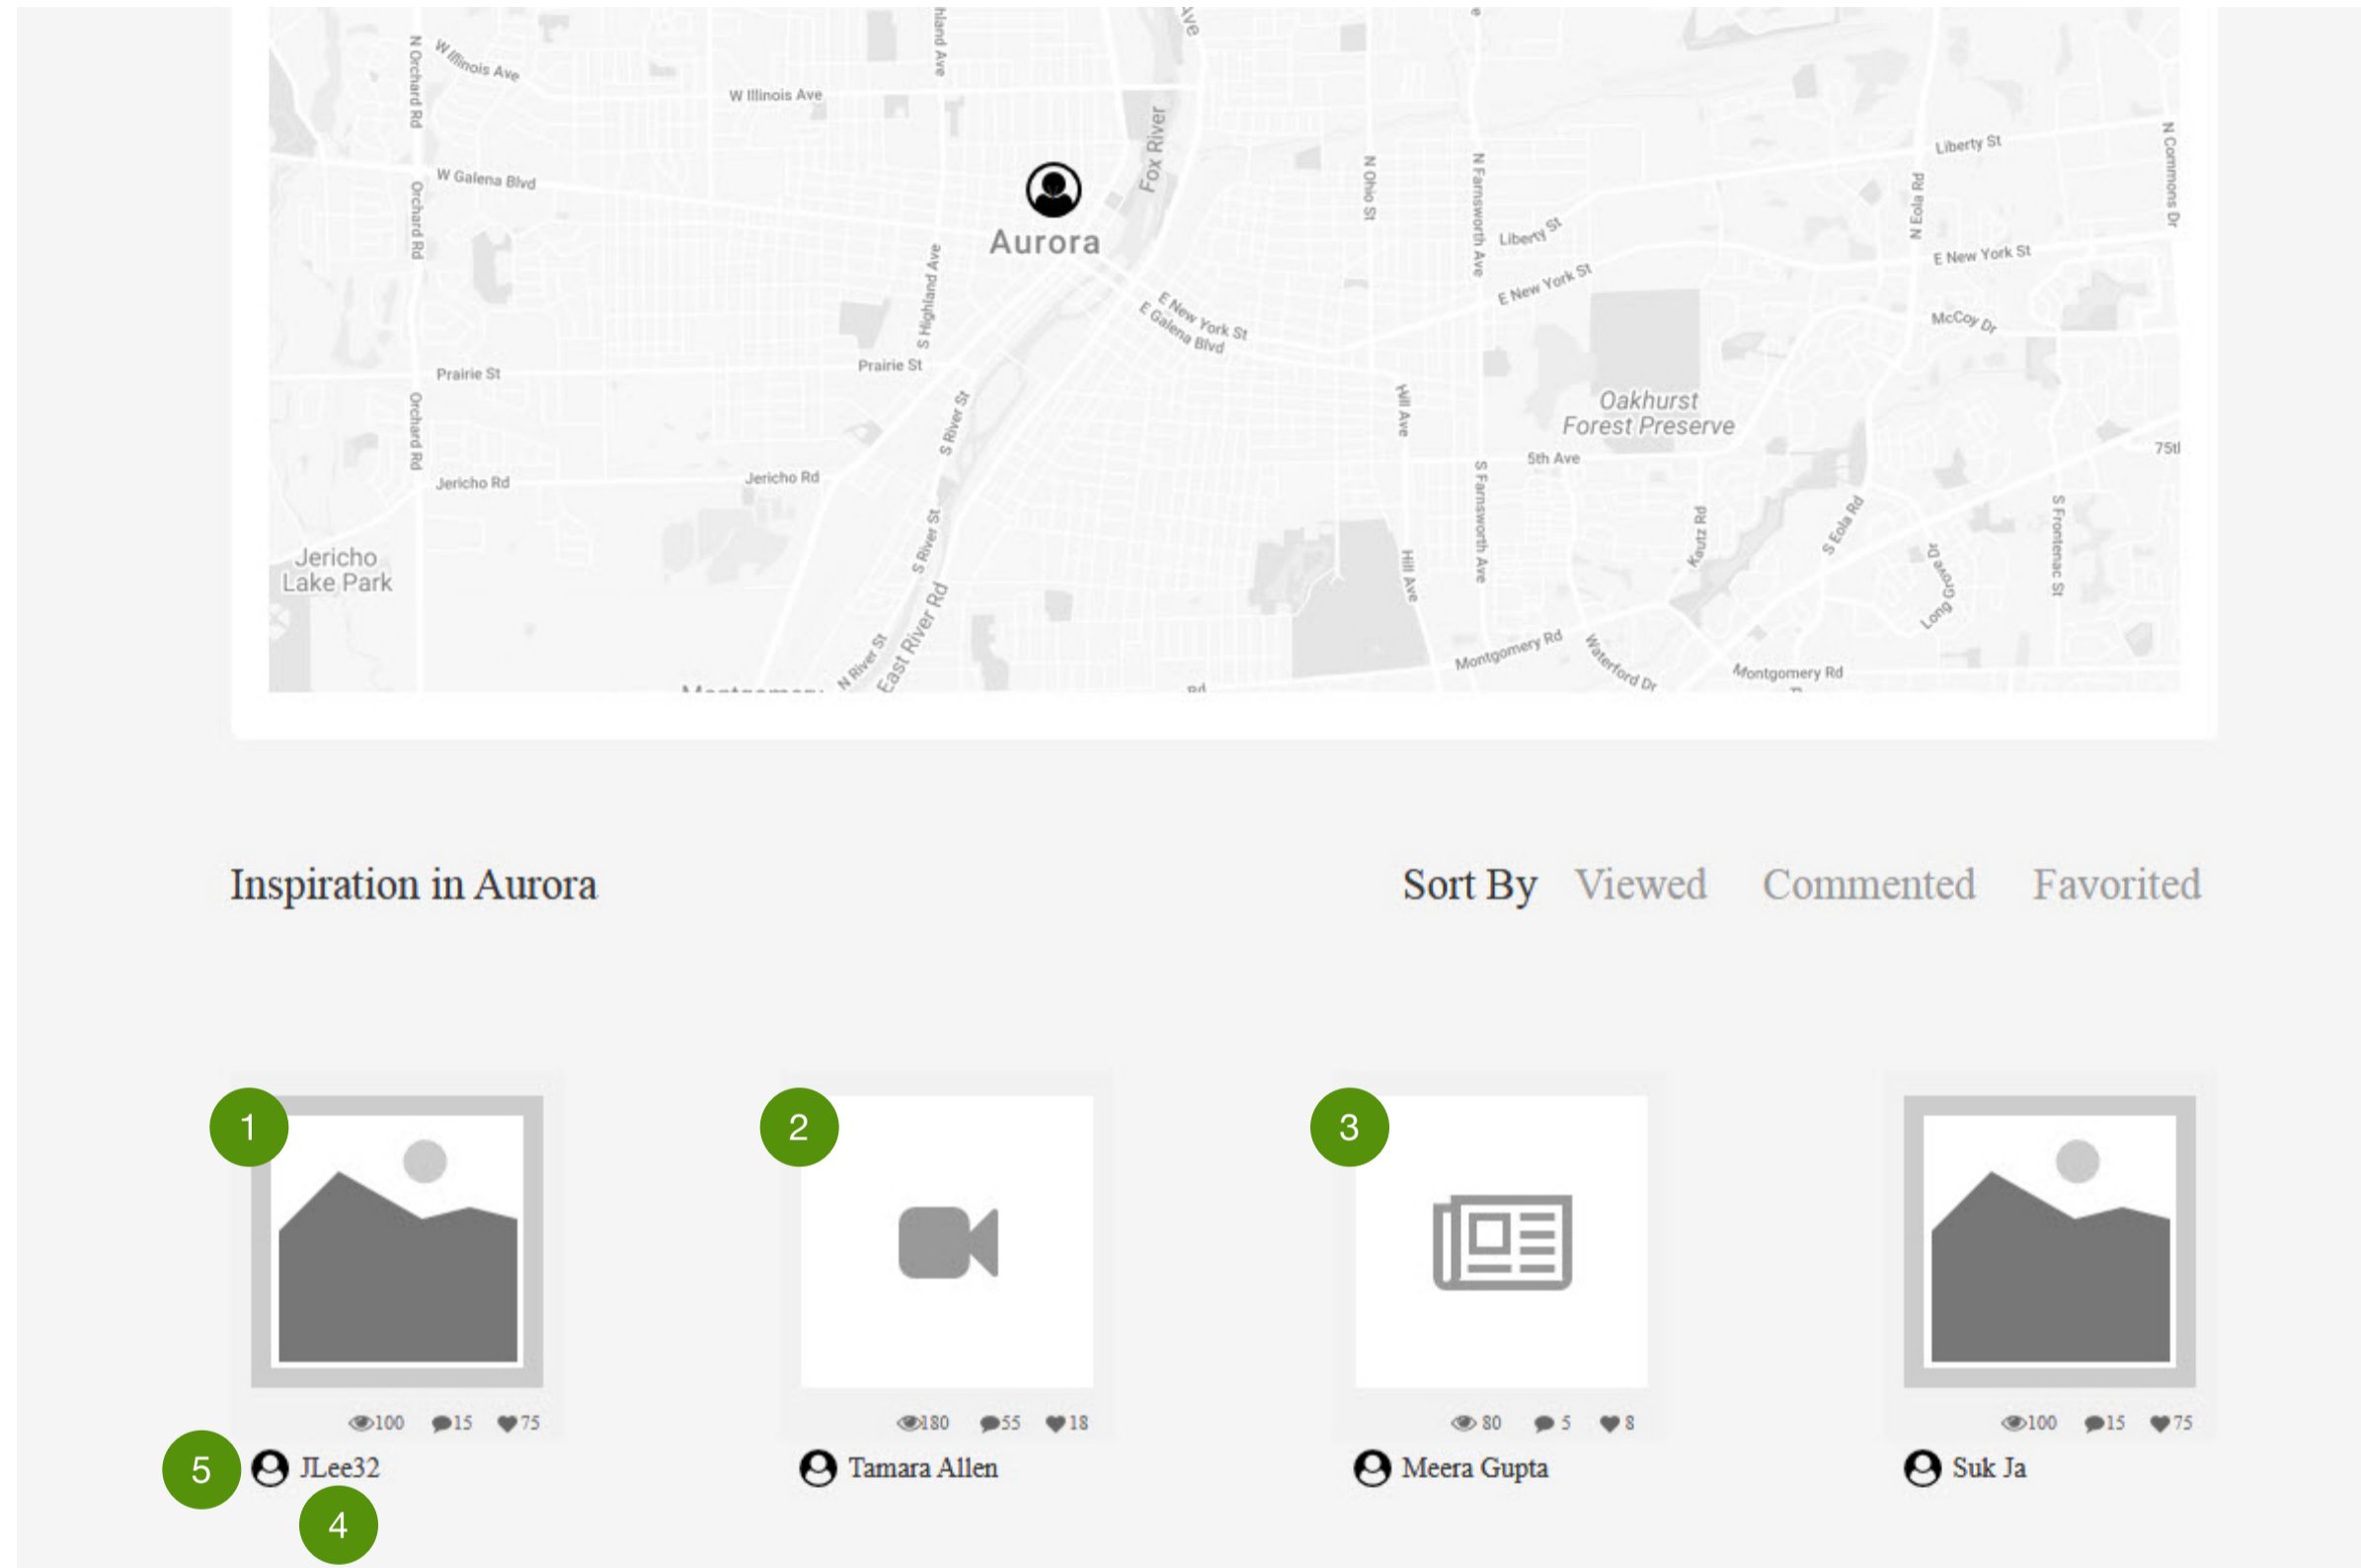

UI & Dev: The link will have a hover stage showing a quote on when mouse is over. When clicked on, a post of the Quote will show up with a lightbox darkening the background.

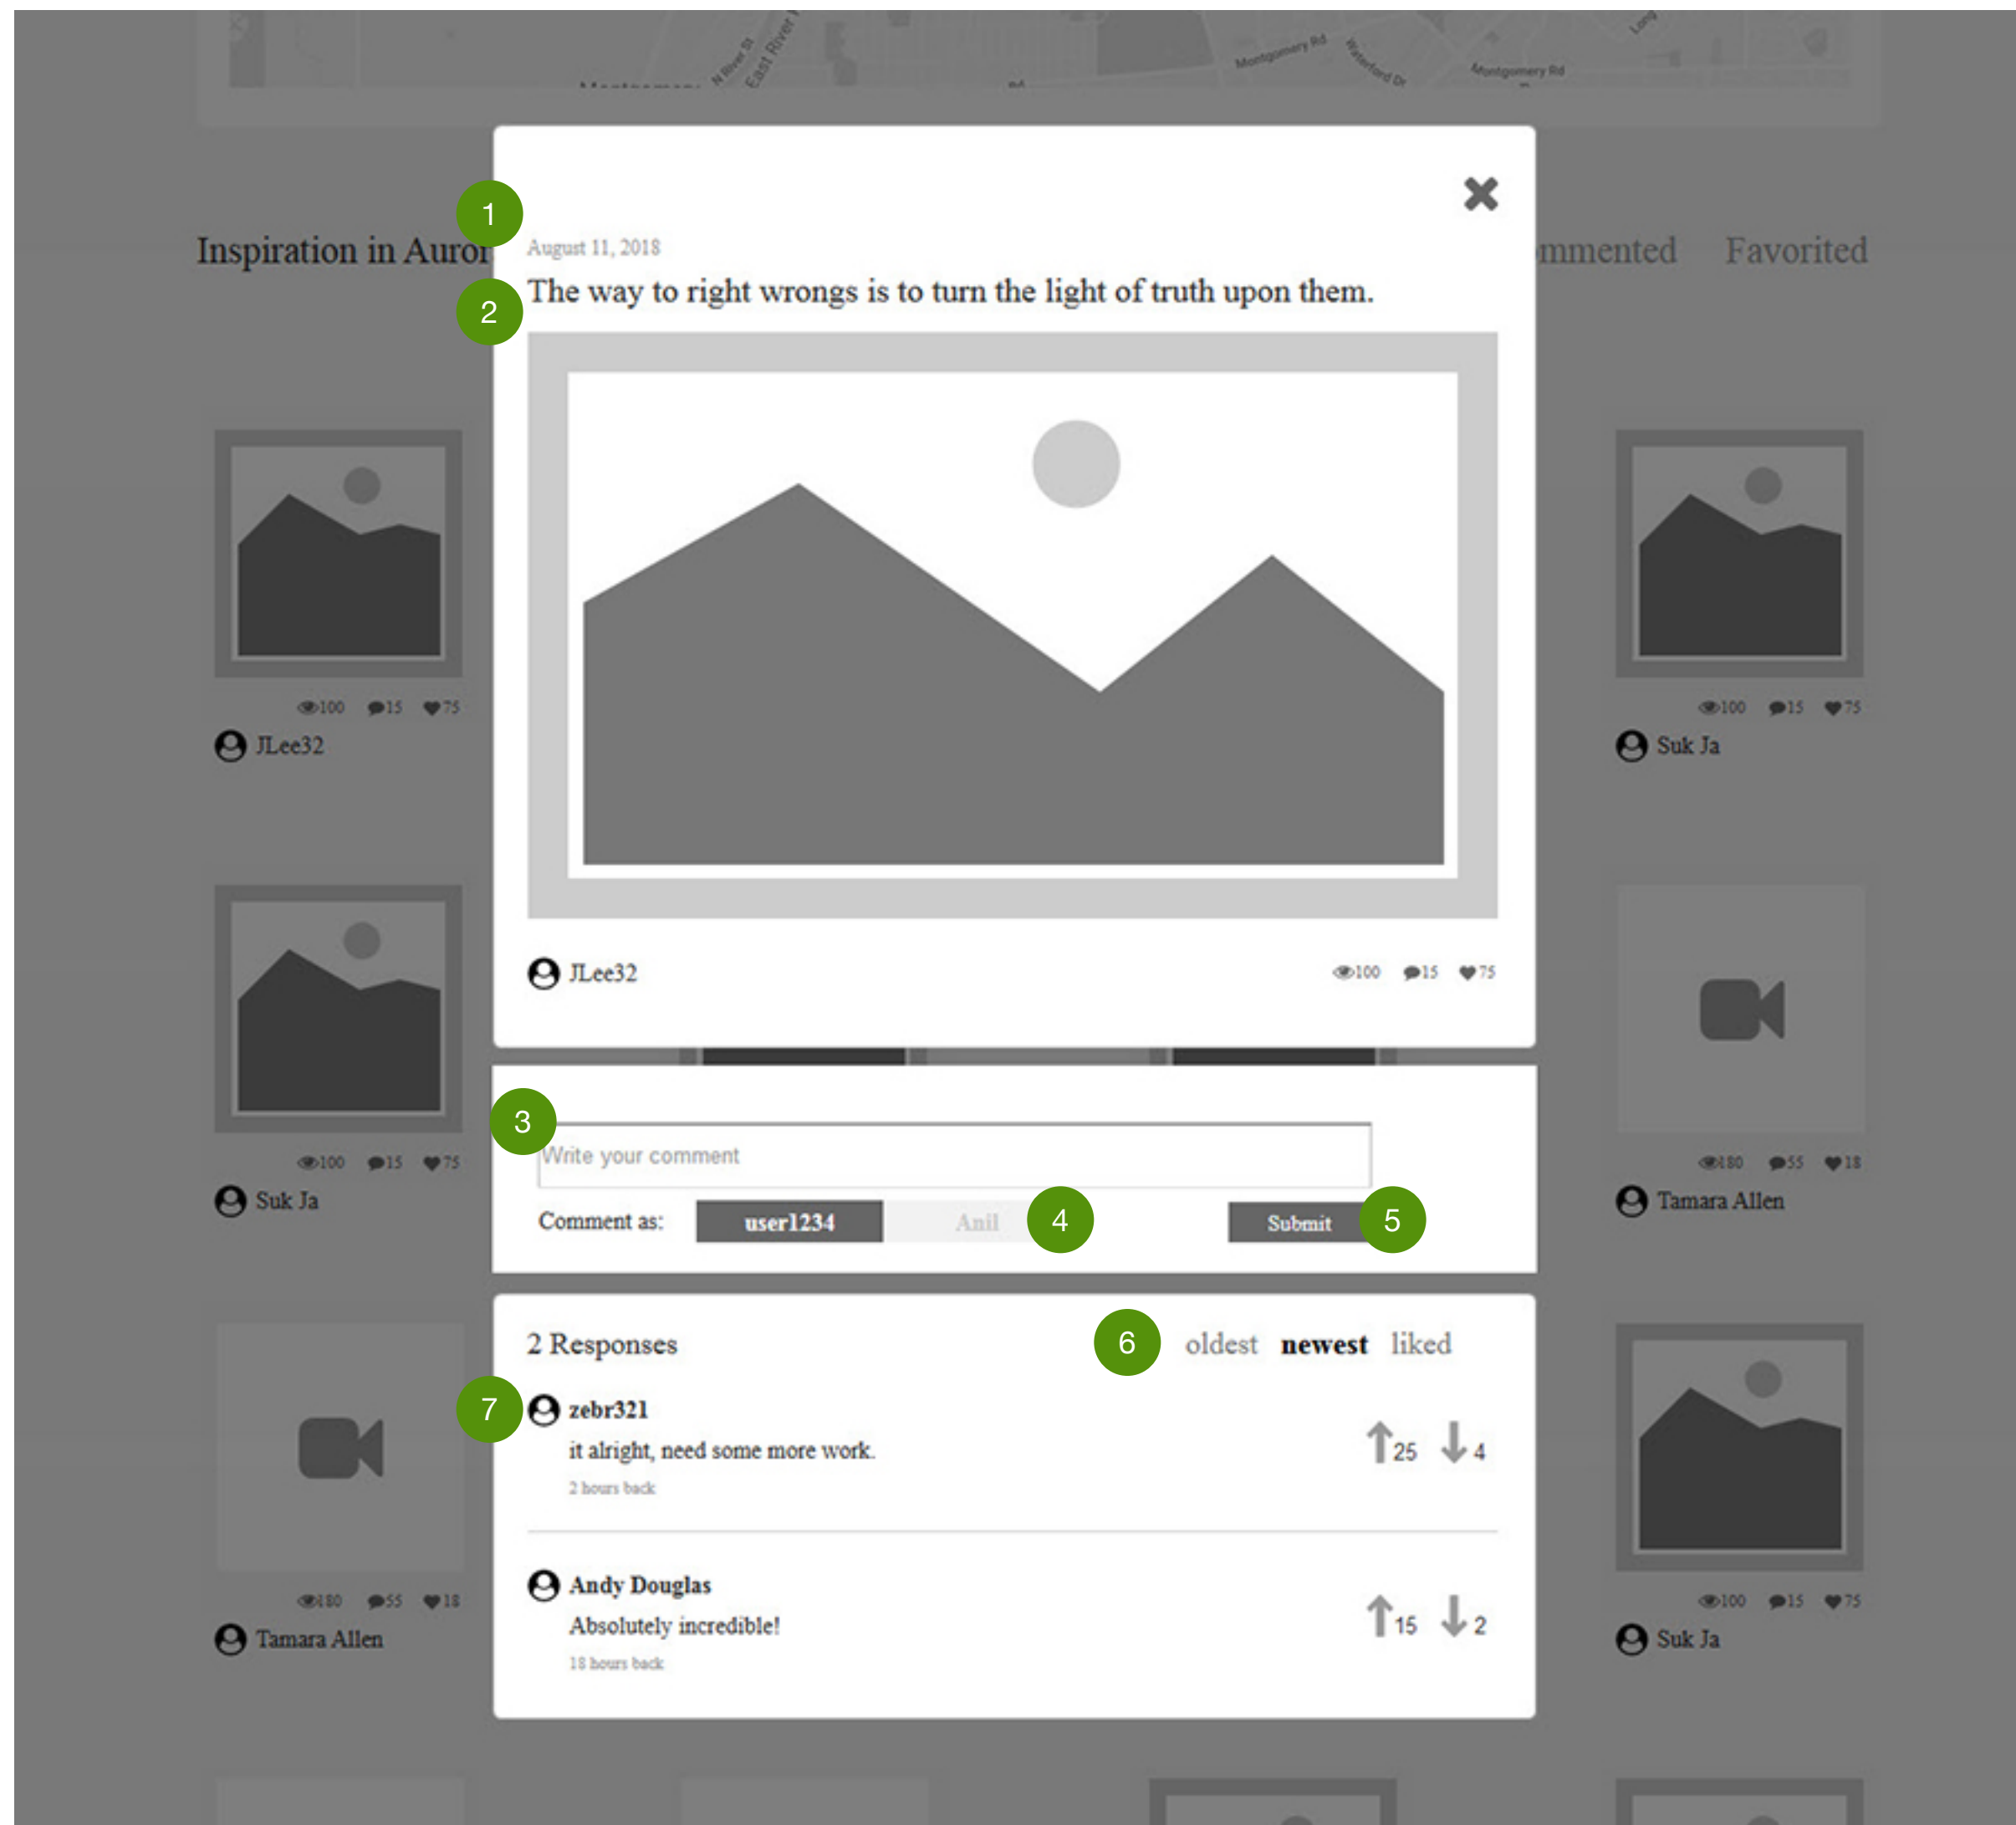

4 USERNAME/REAL NAME

UX: User name or real name is shown below each post

5 THUMBNAIL PROFILE PICTURE

UX: the user's profile photo associated with a real-name is shown, if added. If not a default profile image is shown

SCREEN

Post - Details page

- 1 Date**
 UX: This the date the artwork was posted.
 UI & Dev: UI designer can make design decision in terms of the font weighth and size and mainatin a proper heierarchy throughout the page
- 2 QUOTE**
 UX: This is the quote associated with the artwork.
 UI & Dev: UI designer can make design decision in terms of the font weighth and size and mainatin a proper heierarchy throughout the page
- 3 COMMENT TEXTFIELD**
 UX: User will insert comment in the text box
 UI & Dev: The hint 'write your comment' should be displayed in this text box. The hint will disappear once a user starts typing their comment
- 4 USERNAME AND REAL NAME TOGGLE**
 UX: This tab allows the user to toggle between their username and real name profile.
 UI: The active state tab will be filled so the user knows which profile they are currently using.
- 5 SUBMIT BUTTON**
 UX: When the button is click a comment will posted if someone has typed in the comment box text field. If not an error state will appear
 UI: Hover - When mouse is over the "submit button" it
 Future Testing: An error state can be created when no one has entered text in the comment box.
- 6 SORT BY**
 UX: Future testing: Currently these Sort by tabs don't work.
 UI/IXD: What is envision is that these links would sort the comments by oldest, newest, and liked.
- 7 COMMENT CARD**
 UX: Comment is shown with the associated user name or real name profile. When the user clicks the upvote or downvote icons the number updates according to which button the user clicks.
 UI: When there are more upvotes than the posting above the comment moves up. When there are more downvotes than the comment below the comment moves down.
 IxD: The number of votes will update when the user clicks the upvote or downvote icon
